PROJECTS

Package Tracker [Code Repo](#) [Live Project](#)

Full stack React application which allows users to track their packages, and store tracking numbers from USPS, UPS & FEDEX in a single app.

- Built with React, React-Router, React-Bootstrap and SASS on the front-end.
- Node (Express) on the back-end; MongoDB for data storage.

Compound Exercises Log [Code Repo](#) [Live Project](#)

React - Typescript application to observe plateaus and progress in the gym and keep track of exercise performance.

- Built with React, Typescript, React-Router.
- Styled with MUI5 and Chart.js

WORK EXPERIENCE

Mosaic Services (U.S HHS/ORR contractor) - Dallas, TX

Unaccompanied Minor Reunification Specialist | July 2018 - Present

- Assessed and assisted the sponsors of unaccompanied migrant minors with the reunification process by providing fingerprinting services for the required in depth federal background check, along with providing assistance and guidance with the required documentation.
- Developed and increased connections with local agencies to provide social and personal services for minors and sponsors.
- Drastically decreased appointment wait time while providing record number of appointments to sponsors.

Equest Therapeutic Horsemanship - Dallas, TX

Intern | January 2018 - May 2018

- Effectively assisted and managed aggressive patients.
- Ensured patients' safety and assisted instructors throughout the therapeutic sessions.

GAP inc | Old Navy

Store associate | April 2015 - December 2017

- Successfully implemented innovative store designs and increased merchandise processing time.
- Increased sales conversion rates along with credit card applications.
